**About Partners In Care Maryland, Inc.**

Partners In Care Maryland is a community nonprofit helping older adults remain independent in their own homes. Operating in five counties throughout Maryland since 1993 and currently embracing 2,600+ members, we use a service-exchange concept as the foundation for our support for members. The objective is to build a community network of care around people as they age by engaging people to help each other with the myriad tasks involved in everyday living. Neighbors volunteer their time and services to help seniors live with dignity and independence. Everyone contributes something and is valued for it in the reciprocal exchange of services.

Our Team consists of bright, energetic and talented people who have a passion for making a difference in the world by helping underserved communities.
